

HOLMES®

220 SNATCHER

Some Optional Equipment May Be Shown.

The Snatcher by Holmes is your answer for a rugged light-duty fully hydraulic unit designed to be easily installed in the bed of a 3/4- or 1-ton pickup truck. The unit is operated by a 12-volt electric/hydraulic pump system that connects to your vehicle's power supply. All functions of folding, unfolding, extending, retracting, raising, lowering and operating the wheel claws can be done from the inside of your truck cab using the remote. The Snatcher is ideal for moving vehicles around lots, repossession and light-duty towing with a lift rating of 3,500 lbs. Actual towing limitations will vary depending on your truck, and optional counter-weight and spring kits may be required. If you are looking for a bolt-in unit that you can rely on, check out the Snatcher by Holmes at your local Miller distributor.

Proven Design & Technology

STANDARD FEATURES

- Hydraulic Auto Loading Wheel Lift
- Electric/Hydraulic Power Unit with Reservoir
- 4 Function In-Cab Remote Control Pendant on Cord
- Safety Chains, 5/16 Grade 70
- Wheel Lift Straps
- Power Boom Elevation
- Power Fold
- Self Centering Crossbar
- Pre-assembled and Tested

CHASSIS RECOMMENDATIONS

The Holmes 220 Snatcher is designed to be installed on a pickup truck chassis with an 8 ft. bed only. With 1400 lbs. of weight in the rear, the truck bed should not sit higher than 37 1/2 inches from the ground. The minimum recommended GVW is 8,600 lbs. and a helper spring package is recommended in the rear. Never exceed the chassis maximum GVW rating during towing.

The Snatcher bolts into the bed of your pickup truck and is ideal for light-duty towing such as repossession work, moving vehicles around parking lots or moving vehicles in parking ramps or garages where height clearance may be an issue.

SPECIFICATIONS

UNDERLIFT

Lift Capacity Extended	3,500 lbs.
Lift Capacity Retracted	3,500 lbs.
Maximum Reach	66 1/2"
Tow Rating	7,500 lbs.
